PROFESSIONAL SUMMARY

Business Analyst with 2.5+ years of progressive, cross-domain experience spanning Healthcare IT, Fintech/BFSI, Ed-Tech, and Automotive Technology. Originally from a science background (M.Sc. Human Physiology), began career in clinical data management at Cognizant before making a deliberate, structured transition into Business Analysis. Built hands-on BA expertise through project-based internship engagements — gaining full-scope exposure to requirements elicitation, BRD/FRD documentation, Agile sprint delivery, SQL data validation, Power BI reporting, and REST API testing across four industries. Now actively seeking a permanent, long-term Business Analyst role to apply this cross-domain foundation with depth and continuity.

CAREER TRANSITION & CONTEXT

After one year in clinical data operations at Cognizant (Oct 2022 – Nov 2023), I made a planned decision to pivot into Business Analysis — a role that aligned more directly with my analytical strengths and cross-functional interests. I voluntarily resigned to focus on formal upskilling.

Between Nov 2023 and Apr 2024, I completed a PG Certification in Business Analysis at E&ICT Academy, MNIT Jaipur. I then pursued three project-based BA internships (Apr 2024 – Sep 2025) across Ed-Tech, Fintech, and Automotive verticals to build practical, multi-domain BA experience before entering a permanent role. Each engagement involved real deliverables — BRDs, sprint management, dashboards, API validation — with defined project scopes. The final engagement at Hanyaa Auto Technologies concluded in Sep 2025 due to company restructuring.

I am now seeking a full-time permanent Business Analyst position where I can commit long-term and grow with one organisation.

CERTIFICATIONS & ONGOING LEARNING

- PG Certification in Business Analysis | E&ICT Academy, MNIT Jaipur / Intellipaat | 2024 — *Completed during career transition Nov 2023 – Apr 2024*
- Microsoft Certified: Business Analyst | Microsoft | In Progress
- MBA in Data Analytics | Manipal University Jaipur | 2025 – Present — *Ongoing alongside work*

CORE SKILLS & TECHNOLOGY STACK

BA Documentation: BRD, FRD, SRS, Functional Specifications, User Stories, Epics, Acceptance Criteria, Use Cases, MoSCoW Prioritisation, RTM, Gap Analysis, Feasibility Study, Release Notes

Agile & PM Tools: Scrum, Kanban, JIRA, Confluence, Sprint Planning, Backlog Refinement, Story Creation, Product Roadmap Support, SDLC, Change Management, Stakeholder Management

Data & Analytics: SQL (Joins, Subqueries, CTEs, Data Extraction, Validation), Power BI, DAX, KPI Dashboards, Data Modelling, Advanced Excel, Business Intelligence

Testing & Quality: UAT Coordination, Defect Triage, Root Cause Analysis, REST API Validation (Postman), RTM Traceability

Process & CRM: As-Is / To-Be Mapping, Business Process Reengineering, Salesforce CRM, CRM Optimisation, Process Optimisation

Tech & Design: UML, PlantUML, Figma (Wireframing), Lucidchart, Microsoft Visio, Process Flow & System Diagrams

Domains: Healthcare IT, Clinical Data Management (GCP), Fintech / BFSI, Ed-Tech, Automotive Technology, Pharma / Life Sciences

PROFESSIONAL EXPERIENCE

Business Analyst Intern | Project-Based

May 2025 – Sep 2025

Hanyaa Auto Technologies, Hyderabad | Automotive Workflow Automation, AI/ML Systems, Agile Delivery

Project-based internship. Concluded Sep 2025 due to company restructuring.

- Elicited and documented business and system requirements for automotive workflow automation; authored BRD and Functional Specification documents, defined Acceptance Criteria, secured stakeholder sign-off — achieving zero revision cycles on 3 key deliverables.
- Validated AI/ML-based REST APIs using Postman, documented NLP-driven workflows — improving model accuracy from 80% to 95% and driving a 30% uplift in user engagement.

- Managed epics and user stories in JIRA with full RTM traceability; facilitated Agile sprint ceremonies, improving cross-functional delivery efficiency by 30%.

Business Analyst Intern | Project-Based

Oct 2024 – May 2025

NeoG Camp, Remote | Ed-Tech Platform, Multi-Currency Payment Gateway, Learner Analytics, Power BI
Project-based internship for platform build and analytics dashboard delivery.

- Authored BRD and FRD, applied MoSCoW prioritisation, and coordinated UAT for a multi-currency payment gateway (Razorpay, Stripe, PayPal) — increasing payment success rate by 10%; managed defect triage to closure.
- Conducted funnel and cohort analysis to identify learner drop-off; drove a 22% course completion improvement and built Power BI dashboards cutting manual reporting effort by 80%.
- Wrote SQL queries to validate financial transactions (reducing data mismatches by 25%); performed REST API testing via Postman and maintained process flow and release documentation throughout.

Business Analyst Intern | Project-Based

Apr 2024 – Oct 2024

Intellipaath Software Solutions, Remote | E-Learning Platform, Multi-Product Ecosystem, Agile Delivery, UML
First BA internship post-certification, scoped across 3 products simultaneously.

- Authored 15+ use case documents and conducted feasibility studies and BPR across 3 platforms using UML and root cause analysis — reducing requirement ambiguity by 40%.
- Managed product backlog across 6 Agile sprints in JIRA and Confluence, improving team velocity by 20% and achieving 100% on-time sprint delivery.
- Developed As-Is/To-Be process maps in Lucidchart and Microsoft Visio; bridged communication across product, engineering, and client teams — cutting approval cycle time by 30%.

Process Executive — Clinical Data Management

Oct 2022 – Nov 2023

Cognizant Technology Solutions, Kolkata | Healthcare IT, Clinical Trials, SQL Reporting, GCP Compliance
Full-time permanent role. Voluntarily resigned to pursue a planned transition into Business Analysis.

- Extracted, cleansed, and validated clinical trial datasets using SQL across 5+ structured databases — reducing reporting errors by 20% and data discrepancies by 15%, maintaining 100% GCP compliance across all trial phases.
- Owned end-to-end data accuracy reporting for cross-functional clinical and regulatory teams; flagged and resolved 3 recurring data pipeline inefficiencies, reducing manual reconciliation time by ~2 hours per reporting cycle.
- Built documentation discipline and structured stakeholder communication skills across clinical and regulatory teams — forming the direct foundation for requirements engineering in every subsequent BA engagement.

KEY PROJECTS

Bank Loan Analysis Dashboard | Power BI | SQL | DAX | Data Modelling

- Designed an end-to-end loan analysis dashboard using SQL for data extraction and Power BI for visualisation — KPI drill-downs across loan categories, approval rates, and risk segmentation; improved credit review team usability by 20%.
- Engineered DAX measures and data model relationships supporting dynamic filtering across 5+ dimensions and 10,000+ records.

EDUCATION

MBA in Data Analytics Manipal University Jaipur	2025 – Present
M.Sc. Human Physiology University of Calcutta	2020 – 2022
B.Sc. Physiology University of Calcutta	2017 – 2020
